

The Cloudsoft Evolve Professional Service continuously adapts your application to reduce costs, increase uptimes, respond to business events and exploit the pace of innovation in AWS.

Benefits

- AWS Certified Professional experts will identify the most suitable applications to start refactoring in response to business need and new innovations.
- A safe, easy and reliable way to transform to cloud and embrace cloud benefits, including increased agility and reduced spending.
- Cloudsoft will recommend Refactoring opportunities at a regular cadence.
- Cloudsoft will work with your team to deploy refactored application stacks and test them.
- Integrated with the Cloudsoft Managed Run Service, we will promote your refactored application to production.

Deliverables

- Interactive workshops to Assess the right application for Refactoring.
- Refactoring Plan describing the application complexity and how it will be refactored and managed in the AWS cloud.
- Refactor the Application Blueprint and deploy and test.
- Promote the refactored application to Production.

Target Audience

Application Owners that need help getting their applications into AWS. This service is also great for Cloud Solution Architects and Administrators that need help ingressing applications to their AWS cloud accounts.

Roles and Responsibilities

- Cloudsoft Consulting Engineer will run the plan and provide all application and cloud expertise to deliver the refactoring.
- Customer needs to provide available application owners/specialists and (if available) their Cloud Administrators.
- Forward plan for ongoing application management delivered jointly by Cloudsoft and Customer, with Cloudsoft having responsibility for cloud operations unless agreed otherwise.

Key Activities

Action	Responsibility
<i>Kick off</i>	All
<i>Assess Application</i>	Cloudsoft and Customer App Owner and Operations
<i>Remodel Application</i>	Cloudsoft (plus customer shadow)
<i>Deploy Refactored App</i>	Cloudsoft
<i>Wrap Up</i>	All

Pricing and Scope

This service can only be bought bundled with Cloudsoft Managed Run Service.

One application that meets the maximum sophistication criteria for standard replatforming (more sophisticated apps fall outside this Service offering).

Delivered by a Cloudsoft Cloud Consulting Engineer backed up by the Cloudsoft AWS Team.
